

Geographic Spread

South Carolina reported **regional activity** this week.

Influenza Indicators

Influenza Indicator	Change from Previous Week
Lab-confirmed tests	Decreased
ILI Percent	Decreased
Hospitalizations	No Change

Regional Influenza Activity

Decreased

Decreased

No Change

No Change

Virologic Surveillance

This week **482** lab-confirmed tests were reported. In the current flu season, there have been **64,078** lab-confirmed tests reported.

Influenza-Like Illness Surveillance

The percent of patient visits to sentinel providers for an influenza-like illness (ILI) was **2.5%**, which is **below** South Carolina's baseline (**3.2%**). The ILI activity level overall was **minimal**.

Influenza-Associated Hospitalizations

This week **58** influenza-associated hospitalizations were reported by **53** hospitals. The cumulative hospitalization rate is **91.6 per 100,000**. In the current flu season, there have been **4654** influenza-associated hospitalizations.

Influenza-Associated Deaths

This week, **2** influenza-associated deaths were reported; however, the deaths occurred during previous weeks. The cumulative mortality rate is **2.3 per 100,000**. In the current flu season, there have been **116** influenza-associated deaths.

Virologic Surveillance

Lab-Confirmed Influenza Cases by Influenza Type to Date*

Influenza Type	No. of Cases (%)				
	This Week	2023-24	2022-23	2021-22	5 season average

*Data presented from previous influenza seasons represents the data from that season through the same week as the current season. Nationally, the influenza season begins with MMWR week 40 and ends with MMWR week 39. The 2023-24 influenza season began on October 1, 2023 and will end on September 28, 2024.

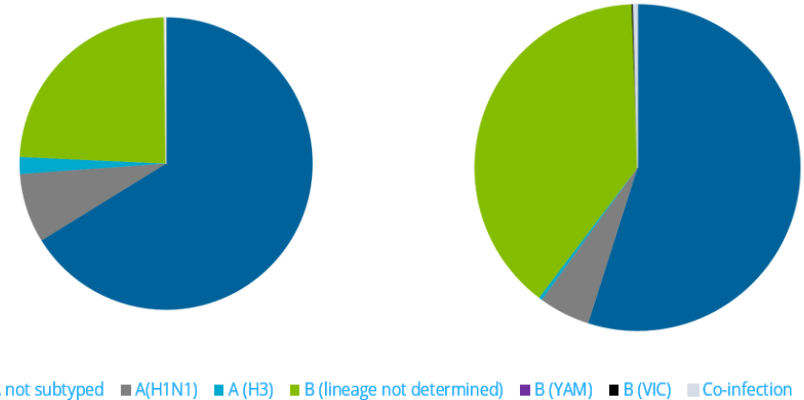

**NS - not subtyped †LND - lineage not determined

§Cases with more than one influenza A subtype in the same sample or with influenza A and B viral types in the same sample simultaneously.

Laboratory-Confirmed Influenza Cases, by Virus Type

Week ending 3/23

Cumulative

Laboratory-Confirmed Influenza Cases, 2021-22 Season to Present

Influenza-Like Illness (ILI) Surveillance

This week, the ILI activity level was **minimal** and **2.5%** of patient visits to SC ILINet providers were attributed to an influenza-like illness. This is **below** the state baseline of **3.2%**.

Reports were received from providers in **21** counties, representing all DHEC Public Health regions.

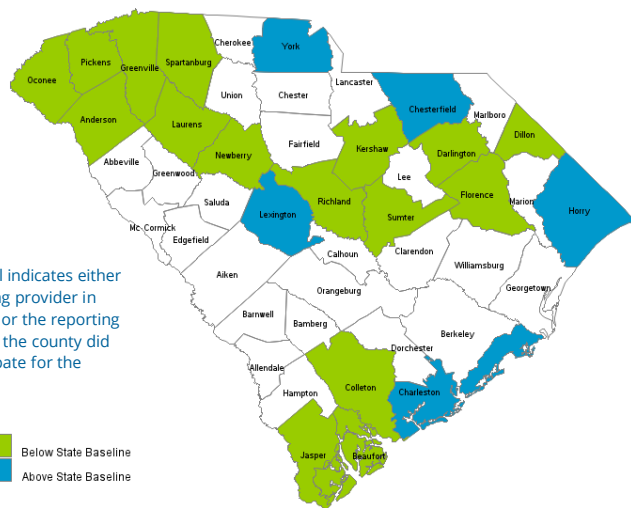

ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.
