

DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL

**CANCELLATION OF PUBLIC HEARING
AND NOTICE OF TERMINATION OF
State Register Document No. 4667**

On September 23, 2016, the Department of Health and Environmental Control published a Notice of Proposed Regulation, identified as Document 4667, in the State Register to amend Regulation 61-105, *Infectious Waste Management Regulations*. Due to the complexity of issues raised by public comments received, the Department canceled the March 9, 2017 public hearing for the proposed amendments and is now terminating Document 4667. The Department will consider these comments in proposing revised amendments to R.61-105, which will begin shortly with issuance of a new Notice of Drafting and, ultimately, Notice of Proposed Regulation under a new document number. This will provide the public with additional opportunities to review and provide input for proposed amendments incorporating consideration of the previously received comments.
