Form Instructions

Certification of Pump System Electrical Connections

Purpose: The purpose of this form is to provide certification that a pump system has been installed correctly and all electrical connections have been made. This form must be completed by a licensed electrician or a licensed septic system installer.

1. RE (Installation): Complete this section with the applicants name and permit number.

2. Address: Complete this section with the site address.

3. Signature, Date, Name of Company, and Address: These sections must be completed by the individual who is certifying that the pump system electrical connections were made in accordance with the submersible effluent pump standard issued by the South Carolina Department of Health and Environmental Control.

In accordance with Retention Schedule 07335, Onsite Wastewater System Application and Permit Records, form must be retained within the regional office for five (5) years from date of last status change in database, then destroy.
