

# **INFECTIOUS WASTE GENERATION ANNUAL REPORT 2018 Estimate**

**October 2017**

## **S.C. Department of Health and Environmental Control**

The Infectious Waste Generation Annual Report – 2018 Estimate is submitted by the S.C. Department of Health and Environmental Control in compliance with S.C. Code Section 44-93-210. Additionally, Act 119 of 2010 mandates that agencies provide all reports to the General Assembly in an electronic format.

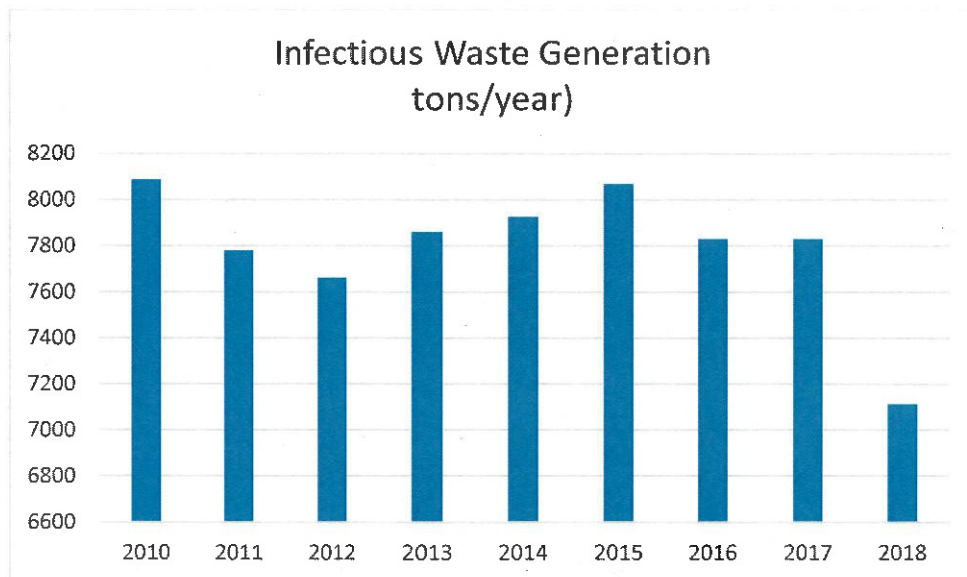

As required by the South Carolina Infectious Waste Management Act, the Department of Health and Environmental Control (the Department) annually publishes a projection of the estimated amount of infectious waste to be generated in South Carolina for the next calendar year. This report fulfills this requirement.

The data used to calculate this estimate has been derived from in-state generators. According to the South Carolina Infectious Waste Management Regulation, R.61-105, any person producing infectious waste in South Carolina must register with the Department annually in writing on a Department registration form. The registration form includes the name of the business, address of the site of generation (each site of generation must apply separately), and the amount of infectious waste generated monthly (estimated within + or -20%). The data upon which this estimate is based was derived from the generator registration forms.

For the one-year period of October 1, 2017 through October 2, 2018, 8,582 generators have reported they produce an estimated 592.77 tons of infectious waste per month or 7113.24 tons of infectious waste in a one-year period. The Department has not been provided any information that would indicate a major change in the amount of waste generated in the next year. Based on the most recent monthly generation rates, the Department expects approximately 7,468.90 tons (5% increase to adjust for database implementation) to be generated in calendar year 2018. Infectious waste generated in private households is excluded from the Infectious Waste Management Act and is not included in this report.

Additional information and resources regarding the infectious Waste Management Program may be found at: [www.scdhec.gov/infectiouswaste](http://www.scdhec.gov/infectiouswaste).

The table below illustrates past generation rates.

**S.C. DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL**

**BUREAU OF LAND AND WASTE MANAGEMENT  
INFECTIOUS WASTE GENERATION**

**TOTAL AMOUNT OF INFECTIOUS WASTE GENERATED IN SOUTH CAROLINA**

<b>Infectious Waste Categories</b>	<b>Pounds per month</b>	<b>Tons per month</b>
SHARPS: Needles, syringes, lancets and scalpel blades.	345603.6	172.8
MICROBIOLOGICALS: Specimens, cultures and stocks of human pathogenic agents.	111069.9	55.53
BLOOD AND BLOOD PRODUCTS: Unabsorbed human blood, or blood products, or absorbed blood and bloody body fluids.	454984.1	227.49
PATHOLOGICAL: Tissues, organs, limbs, products of conception and other body parts removed from the whole body.	81913.15	40.96
ANIMAL: Animal carcasses, body parts and bedding of animals intentionally exposed to human pathogens during research.	2090.6	1.05
ISOLATION: Biosafety Level Four, highly communicable diseases classified by the Centers for Disease Control and Prevention.	99728.28	49.86
OTHER: Other waste material designated by the generator as infectious waste.	90153.16	45.08
<b>TOTALS OF ALL WASTE STREAMS:</b>	<b>1185542.78</b>	<b>592.77</b>

**TOTAL NUMBER OF GENERATORS REGISTERED: 8582**
