

People in our community are getting sick and even dying.

If you're 65 and older or have conditions like diabetes, heart disease or lung disease you're at greater risk of getting seriously ill from COVID-19.

Stay well by:

- Staying home as much as possible
- Taking your prescribed medications

If you must go out for work or essential items:

- Avoid large crowds
- Wear a mask when close to others
- Wash your hands often
