**Plant Information**

(If requesting coverage for more than one plant at a site, complete and submit the "Plant Information" section for each plant, including separate emissions calculators. Provide supporting documentation (i.e. manufacturer's specification sheets) for the plant, dust collector(s), binvent(s), etc., as applicable).

- \*Notes:
- 1) De Minimis analysis is only used if case-by-case modeling is required for another reason
  - 2) Lead is a criteria pollutant and thus does not have a de minimis value.
  - 3) De Minimis rate used for Total Chrome is Chrome6 rate and Manganese compounds.
  - 4) De Minimis assumes 24 hours per day, rounded to 3 decimal places for comparison
