

Covered Electronic Devices Manufacturer Registration Form

Bureau of Land and Waste Management

In accordance with South Carolina Title 48, Chapter 60 South Carolina Manufacturer Responsibility and Consumer Convenience Information Technology Equipment Collection and Recovery Act, the manufacturers of consumer computers, printers, monitors and televisions may not sell or offer for sale a covered device in South Carolina unless the manufacturer provides a recovery program at no charge or provides a financial incentive of equal or greater value. Additionally, the manufacturers of television and computer monitor devices must report certain information to the Department in order that the Department may calculate market share recycling obligations.

This registration process is provided for the manufacturers of covered computer devices, covered computer monitor devices and covered television devices in order that they may document to the satisfaction of the Department that they have met the requirements of the Act and that their devices may be sold in the State of South Carolina.

“Covered computer device” means a desktop, laptop or notebook computer or a printing device marketed and intended for use by a consumer, but does not include a covered television device. “Covered computer monitor device” means a display device typically manufactured without an internal tuner that can display pictures and sound and is designed for use with a desktop computer. “Covered television device” means a device that contains a tuner with a viewable screen of nine inches or larger marketed and intended for use by a consumer.
