Dec. 6, 2021

Dear S.C. COVID-19 Provider:

A new formulation of Pfizer vaccine (Pfizer Tris) for adults/adolescents will be available for order later this month.

- The USG will soon be introducing a smaller dose configuration of Pfizer adult/adolescent vaccine.
- This formulation (Pfizer Tris Sucrose Adult formulation) (Pfizer Tris) does not require diluent for mixing at administration sites, may be stored at 2°C - 8°C (36°F - 46°F) for up to 10 weeks, and can be used on individuals 12 years of age and older. The vials will have a gray cap.

This formulation will be available for ordering Dec. 23, 2021.

- The USG will retire the current Pfizer PBS (1170 and 450 packs) ordering and transition to the Pfizer Tris-Adult formulation (300 Minimum Dose Quantity) on Dec. 23 for jurisdictions and federal entities.
- Jurisdictions should utilize existing PBS formulations (1170 and 450 dose packs) to the greatest extent possible prior to ordering Pfizer Tris.

Key Considerations:

- Jurisdictions and sites should maximize use of all remaining Pfizer PBS doses prior to using the Tris-Adult.
- Provider sites should ideally carry only one Pfizer adult formulation at a time.
- Provider sites utilizing the Pfizer thermal shipping containers for temporary storage must prepare for use of an ULT freezer -or-refrigerator moving forward; these shipping containers cannot be utilized to store the Pfizer Tris-Adult formulation.
- In order to avoid mistakes during this period of transition when both products may be in circulation, these products should not be offered/administered at the same time.

NOTE: Although Pfizer Tris will be available to order on Dec. 23, 2021, allocations have not yet been set and orders may not be available for fulfilment immediately.
