RE: No. 1 and No. 2 Combination Boilers SO₂ Test Plan Submitted September 9, 2021

Dear Mr. Hobson:

The referenced site-specific test plan is approved by the Department contingent upon the following:

- Any deviations from the plan, without prior approval from the Department, may be cause for rejecting the test results.
- All testing, monitoring and QA/QC requirements specified in the applicable regulations, test methods, revisions, and permit conditions are to be followed.
- New-Indy shall record, and report all required process and operating parameters. These parameters must be recorded at least every 15 minutes during the testing. Recording these parameters is the responsibility of the facility, not the contractor conducting the test, and failure to record these parameters may also be cause for rejecting the test

The approval of this test plan should not be construed as acceptance of New-Indy's premise for conducting this additional testing. Further, the testing and resulting data will not be considered a replacement test and will not supersede the data from the June 21-27, 2021, testing. Data from both tests will be evaluated independently and utilized as the Department deems appropriate.

If I can be of any further assistance, please do not hesitate to call me at (803) 898-2231 or contact me via e-mail at justice@dhec.sc.gov.

Sincerely,
