

A New Platform for COVID-19 Vaccine Providers--Enrollment Required

On Monday, March 14, SCDHEC will begin using the new **SCIAPPS** provider enrollment platform for all COVID provider enrollment. This platform will take the place of the COVID provider enrollment system we have used up to this time.

It is imperative that you register on this new platform to continue to order and receive any COVID -19 vaccines. To initiate your COVID-19 enrollment into this new platform, you will receive an email from SCIAPPS on **Monday, March 14**, prompting you to change your password. **You must use the link within the email to change your password within 24 hours of receiving the email. Your password must be changed before you can log in.**

Your CMO and CEO (Responsible Officers) will receive the SCIAPPS emails for your organization. If additional user access is needed, the Responsible Officers can add additional users, known as Location Representatives, to the application.

Once logged into the application, you will see your previously submitted COVID-19 provider enrollment application. You may make updates to your location data or add additional locations as needed. New enrollments or enrollment changes that are made outside of SCIAPPS after March 14th will not transfer to the new SCIAPPS application.

Please open the SCIAPPS email on Monday, March 14 and create your new account as soon as possible.

Please send questions to COVIDVaccines@dhec.sc.gov.
