6  Program Contacts
New Provider Checklist

- Submit new provider activation survey no later than **24 hours following activation**. Failure to do so will result in exclusion from COVID-19 Vaccination Program.
- Set up VaccineFinder account and review inventory reporting requirements.
- Review DHEC’s phase 1a guidance and phase 1b guidance to ensure your facility understands the target groups for vaccination.
- Review v-safe and VAERS vaccine safety program considerations with all applicable vaccinating staff.
- Review Pfizer/Moderna/Janssen Emergency Use Authorizations (EUA) fact sheets.
- Review Pfizer/Moderna/Janssen vaccine preparation and administration trainings with all vaccinating staff.
- Review Pfizer/Moderna/Janssen storage and handling trainings with all appropriate staff.
- Ensure your storage unit is prepared to receive your first vaccine supply, including the placement of any approved continuous monitoring device, and utilization of temperature monitoring logs for twice-daily monitoring.
- Review DHEC’s COVID-19 Vaccine Provider Webpage for training and resource documents for programs and systems listed above.
- Attend COVID-19 Vaccine Provider Town Hall Q&A forums on Wednesdays and Fridays from 11a-12p.
COVID-19 Vaccine Provider: DHEC Contacts

- **DHEC VaxLocator Map**
  - Red/green color updates, information updates
  - VaxStatus@dhec.sc.gov

- **COVID-19 Vaccine Management Branch**
  - Vaccine inventory requests, vaccine orders, direct ship vaccine shipments/deliveries, temperature monitoring, transport logs
  - COVIDVaccines@dhec.sc.gov

- **COVID-19 Provider Enrollment Branch**
  - New enrollment form submissions, vaccine coordinator contact information changes, enrollment form updates, redistribution agreements
  - COVIDProviderEnrollment@dhec.sc.gov

- **New Provider Onboarding and Support/VAMS**
  - VAMS@dhec.sc.gov

- **COVID-19 Provider Portal Reporting**
  - vaxreporting@dhec.sc.gov

- **Schools and COVID-19 vaccine planning**
  - ACC-schools@dhec.sc.gov

- **DHEC Redistribution Warehouse**
  - State-supplied ancillary kits, vaccine redistribution orders
  - RSS@dhec.sc.gov
COVID-19 Vaccination Program Overview

SC COVID-19 Vaccine Program
COVID-19 Program Requirements Refresher

• Cannot bill for the vaccine provided via the program
• Must waive any out-of-pocket fees for vaccine administration due to inability to pay
• Retain all COVID-19 Vaccination Program-related documentation for three (3) years
• Provide current EUA fact sheets, updated/completed vaccination record card, and v-safe information to vaccine recipients each time a vaccine is administered
COVID-19 Program Requirements Refresher

- Report administered doses within 24 hours of administration to VAMS and/or SIMON
- Report COVID-19 vaccine inventory daily to VaccineFinder
- Report temperature excursions to DHEC after consulting with vaccine manufacturers and documenting outcomes on required form
- Report all spoiled, expired, and wasted vaccine to VAMS
- Report all suspected vaccine adverse events and administration errors to the Vaccine Adverse Event Reporting System (VAERS)
COVID-19 Vaccine Landscape

• Review DHEC phase 1a and phase 1b guidance to understand priority groups listed that should be targeted for vaccination
• DHEC currently receives limited federal allocations for three vaccine types
  • Pfizer 1st and 2nd doses
  • Moderna 1st and 2nd doses
  • Janssen 1st doses
• Orders are placed once a week for delivery the following week
• Only one vaccine type is assigned to providers at activation
• Currently ~500 activated vaccine providers participating in statewide program

DHEC and CDC Systems
Provider Reporting and Documentation Requirements
Provider Participation Requirements Overview: Inventory

- Inventory requests submitted via VAMS by 11:59pm on Mondays
- Inventory shipments documented in VAMS same day as shipment receipt
- All inventory waste and transfers documented in VAMS within 24 hours of occurrence
  - All transfers documented on COVID-19 Transport Log
- Report on-hand COVID-19 vaccine supply daily through the VaccineFinder COVID Locating Health Portal
Provider Participation Requirements

Overview:
Vaccine Administration Documentation

• COVID-19 providers must document all administered vaccines within 24 hours of administration via one of the following methods:
  • VAMS Standard/Mobile Clinic or Third-Party Clinic Type
  • Organization Electronic Health Record (EHR) with existing interface with SIMON
  • Direct data entry into SIMON
Provider Participation: DHEC Provider Portal

- **H3707** signed into law February 19, 2021
- Mandated reporting effective Wednesday, March 10, 2021
- Law requires daily provider reporting into a DHEC reporting mechanism that includes metrics such as inventory and scheduled appointments
- Access and next steps guidance notices will be automatically sent to primary and back-up vaccine coordinators via provider portal
- The portal will issue daily reporting reminders by 4pm if no data has been reported
- Provider participation is mandatory and required by law

VaccineFinder Overview

• **VaccineFinder** is a web-based tool for the public that has been traditionally used to locate routine immunizations

• Serves as the inventory reporting tool for COVID-19 providers (not public facing)

• Providers can elect to make their locations visible in VaccineFinder to facilitate better access to vaccines among eligible groups
VaccineFinder: Registration

• The monitored organization contact email address listed in the DHEC Enrollment Form Section A receives an account registration email from vaccinefinder@auth.castlighthealth.com

• The contact must complete account registration steps to
  • Confirm contact information
  • Determine reporting method (facility level or organization level)
VaccineFinder Account Activation Steps

1. The organization email listed from an enrolled provider’s section A form will receive an email from vaccinefinder@auth.castlighthealth.com to complete account registration in VaccineFinder.

2. The email will look like the image to the right. Click the “Create Account” button to complete VaccineFinder registration via the COVID Locating Health Provider Portal.

3. Open the registration email and click on the “Create Account” button. **Please note, the link is a one-time use only and will expire after the first click.**

4. Please ensure the link opens in one of the approved browsers (Chrome or Safari).
   a) Troubleshooting: use mouse to right-click the link and select copy link; paste link directly into one of the above approved browsers.

5. Registration page will refresh to prompt username and new password creation

6. Click submit, the page will redirect to the VaccineFinder login page.
   a) Please bookmark this page for future use
Create Account

Dear [FIRST NAME],

As an entity enrolled in the COVID-19 Vaccination Program, you will need to report on-hand COVID-19 vaccine inventory to the CDC daily using VaccineFinder. VaccineFinder’s COVID Locating Health Provider Portal will help you do this.

Here’s what you need to do:

1. Create an account to complete registration in 7 days. This is a personalized link that will expire after this time.

2. Login each day and enter your data no later than midnight local time.

You must use Chrome or Safari browsers to access the Provider Portal. Link expires after one click.

Already a registered VAMS user?

- Schedule COVID-19 vaccination appointments as a vaccine recipient
- Manage employees or members as an organization or employer
- Manage COVID-19 vaccination appointments as a healthcare provider
- Manage organizations and clinics within jurisdiction as an administrator

Access the following in the VAMS portal and more

**Recipient Portal**
- Register my patient information
- Schedule a COVID-19 vaccination appointment
- Update my COVID-19 vaccination certificate

**Organization & Employer Portal**
- Register your organization's information
- Add employees or organization members for COVID-19 vaccination eligibility

**Clinic Portal**
- Register your clinic information
- Manage vaccination appointments
- Log vaccinations

**Jurisdiction Portal**
- Register your jurisdiction
- Add organizations and clinics within your jurisdiction

---

**VAMS Overview**

**Vaccine Administration Management System (VAMS)**
What is **VAMS**?

VAMS is a web-based system that allows jurisdictions and clinics to support vaccination operations for critical populations.

- **VAMS:**
  - Provides appointment scheduling services
  - Houses inventory request and management tools
  - Documents vaccine administration events
  - Sends vaccine data to the corresponding immunization information system (IIS) and allows providers to fulfill all federal data reporting requirements.

- ✓ Can provide real-time reporting metrics
- ✓ Can request and track vaccine inventory
- ✓ Has dose-level accountability
- ✓ Meets data security requirements
- ✓ Can send reminders to vaccine recipients for follow-up doses and appointments
- ✓ Can provide a certificate of completion to the recipient
VAMS is Composed of Four Portals Spanning Multiple User Groups

- **Jurisdiction Portal**
  - Jurisdiction Points of Contact

- **Vaccination Clinic Portal**
  - Clinic Administrator
  - Clinic Inventory Manager
  - Clinic Healthcare Professional
  - Clinic Front Desk

- **Organization and Employer Portal**
  - Organization/Employer Coordinator

- **Vaccine Recipient Portal**
  - Vaccine Recipient
What is the Vaccination Clinic Portal?
- An interface for clinics to support scheduling, immunization tracking, and inventory management
- Vaccination Clinic Types include:
  - Standard
    - Hospital
    - Pharmacy
    - Clinic
  - Mobile
  - Third-Party

What are the Key Goals of the Vaccination Clinic Portal?
- Set up and manage clinic schedules, if applicable
- Document administered doses
- Manage and request inventory

The Vaccination Clinic Portal is not:
- An interface DHEC can access
- An interface recipients will access (they will have their own portal)
- An interface employers will access (they will have their own portal)
- A downloadable app (i.e., from App Store)
# Key Differences Between Clinic Types in VAMS

## Standard and Mobile
- **Clinic Roles (4)**
  - Clinic administrator
  - Healthcare professional
  - Inventory manager
  - Front desk

- **Scheduling**
  Set up clinic schedule in VAMS for appointments.

- **Accessibility**
  Recipients use VAMS to:
  - Record medical history
  - Search for vaccination clinics
  - Schedule appointments
  - View vaccination certificates

- **Next-Dose Eligibility**
  Recipients receive reminders from VAMS on when they should schedule follow-up appointments.

## Third-Party
- **Clinic Roles (3)**
  - Clinic administrator
  - Healthcare professional
  - Inventory manager *(optional)*

- **Scheduling**
  No clinic schedule set up because no appointments are scheduled by recipients.

- **Accessibility**
  Recipients do **NOT** use VAMS
  - Third-party clinics do not appear in vaccination clinic search results

- **Next-Dose Eligibility**
  Clinic staff tracks vaccine recipients’ next-dose eligibility and communicates it to recipients.
## Benefits and Considerations of Clinic Types

<table>
<thead>
<tr>
<th>Standard Clinics</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Benefits</strong></td>
</tr>
<tr>
<td>Appointments can be scheduled by recipients and/or VAMS clinic users on behalf of recipients. Registration and appointment scheduling does not require recipient email address or phone number.</td>
</tr>
<tr>
<td>VAMS manages all recipient notifications, if contact information provided (e.g. appointment reminders, confirmations, cancellations)</td>
</tr>
<tr>
<td>Clinic schedule is easily adjustable</td>
</tr>
<tr>
<td>Can provide vaccination events for specific groups</td>
</tr>
<tr>
<td><strong>Considerations</strong></td>
</tr>
<tr>
<td>Clinic schedules must be set up in VAMS</td>
</tr>
<tr>
<td>Site is visible to the general recipient population in VAMS</td>
</tr>
<tr>
<td>May be challenging for vaccination events in low internet connectivity areas</td>
</tr>
</tbody>
</table>
## Benefits and Considerations of Clinic Types

VAMS Clinic Portal Users

• VAMS users can have access to multiple portals in VAMS as an organization coordinator, clinic user, and/or recipient

• VAMS users can use the same VAMS login to access the landing page to access the appropriate portal

• Any clinic type can have up to five (5) clinic administrators assigned
  • Clinics must have the clinic administrator, front desk, healthcare professional roles filled to maintain clinic operations. At minimum, one clinic administrator can be assigned all user access roles.

• All other clinic user roles are unlimited
VAMS Workflow - THIRD PARTY

**Step 1**
Create Clinic Administrator Account

**Step 2**
Activate and Set Up Clinic

**Step 3**
Pre-screen and/or pre-register staff/recipients using internal system

**Step 4**
Vaccinate

Does NOT require the use of the Organization Portal

Provider Onboarding Survey: Clinic Decisions

• Determine the clinic location’s point of contact (POC) who will serve as the **Clinic Administrator**
  • First name, last name, phone number, and email address must be documented

• **Determine desired location clinic type based on appointment scheduling and vaccine documentation needs**
  • Standard/Mobile Clinic
    • Clinic
    • Mobile
    • Hospital
    • Pharmacy
  • Third-party
Organization Portal

VAMS Overview

Applies to non-Third Party Clinics Only
STEP 3 Your Portal: Organization Portal

Organization Portal users can use VAMS to:
- Add priority group members to VAMS to be considered for COVID-19 vaccination.
- Automatically send email notifications to those individuals to register in VAMS and schedule their vaccination appointment(s).

As an organization coordinator, you will use VAMS to identify priority group workers and other at-risk groups who need to receive COVID-19 vaccine when it first becomes available and add these individuals in VAMS so they can schedule vaccination appointments. You will also serve as a liaison between your jurisdiction point of contact (POC) and the members of your organization.
## Recipient Registration

<table>
<thead>
<tr>
<th>Registration Option</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Organization Coordinator adds organization members via manual addition, either one at a time or bulk upload, generating an auto email notification to register a VAMS account and schedule an appointment</td>
</tr>
</tbody>
</table>

### Pros
- No email address restrictions
- Cannot be forwarded to others

### Cons
- Cannot control messaging of autogenerated email to recipients
VAMS Onboarding Decisions: Organization Portal

Please note the organization portal is optional
If desired, please document on the onboarding survey:
• The organization’s point of contact (POC) information who will serve as the Organization Coordinator
  • First name, last name, and email address
Complete the new provider activation survey (click link) within 24 hours of activation notice using your location ID.

Your location ID is contained within your activation email.

VAMS Help Desks

- **CDC VAMS Help Desk**
  - Clinic Users submit a help desk ticket
    - submit questions, technical assistance, other issues via the Help function to submit a ticket, or
  - Call 1-833-957-1100, M-F, 8a-8p

- **DHEC Help Desk**
  - Serves SC VAMS Clinic Users, Organization Coordinators and Recipients
  - Email vams@dhec.sc.gov
    - **Clinic Users**: technical assistance, VAMS onboarding, new clinic set-up, additional clinic set-up requests
    - **Organizations**: VAMS onboarding, registration
    - **Recipient**: registration issues
Vaccine Management Requirements
Key Storage and Handling Resources

- **CDC Product Information Guide for COVID-19 Vaccines and Associated Products**
  - Includes ancillary kit, vaccine shipment, storage, and handling information for all three COVID-19 vaccines

- **CDC Storage and Handling Toolkit**
  - [https://www.cdc.gov/vaccines/hcp/admin/storage/toolkit/storage-handling-toolkit.pdf](https://www.cdc.gov/vaccines/hcp/admin/storage/toolkit/storage-handling-toolkit.pdf)
  - Review the COVID-19 Vaccine Addendum
  - Review the transport recommendations for any COVID-19 vaccines

- **US Pharmacopeia COVID-19 Vaccine Handling Toolkit**
  - [https://www.usp.org/covid-19/vaccine-handling-toolkit](https://www.usp.org/covid-19/vaccine-handling-toolkit)
  - Additional preparation and labeling, storage, handling, and transport, and waste and disposal guidance
Temperature Monitoring Requirements

- COVID-19 Vaccine Primary and Back-up Coordinators must monitor and document temperatures of storage units containing COVID-19 vaccines twice daily using approved temperature logs. Daily minimum and maximum temperatures must also be documented daily, ideally at the start of the day.
- COVID-19 Vaccine Primary and Back-up Coordinators must download continuous temperature monitoring device reports weekly.
- COVID-19 vaccine transport logs are also required for any vaccine redistribution/transfer/transport.
- Submit both completed weekly temperature logs and summary continuous temperature monitoring device reports to COVIDVaccines@dhec.sc.gov every Friday by COB.
  - Include Facility Name + Temp Logs in subject line.
Temperature Excursions: during shipment

• Providers must immediately report any temperature excursions during shipment to the manufacturer

• Pfizer Shipments:
  • Pfizer: 1-877-829-2619 or cvgovernment@Pfizer.com

• Moderna and Janssen Shipments:
  • McKesson: 1-833-272-6635 (M-F, 8a-8p/ET)
    • After-hours email COVIDVaccineSupport@McKesson.com
Temperature Excursions: post-shipment

- Providers must immediately report any temperature excursions to the manufacturer for guidance
  - **Pfizer**: 1-877-829-2619
  - **Moderna**: 1-866-663-3762
    - Moderna Temperature Excursion Tool: [https://tools.modernamedinfo.com/excursion/](https://tools.modernamedinfo.com/excursion/)
  - **Janssen**: 1-800-565-4008

- Upon resolution, providers must submit a Vaccine Troubleshooting Record to COVIDVaccines@dhec.sc.gov that documents the event and any associated case number

Provider Participation Requirements Overview: Inventory

- Refer to DHEC’s Inventory Management, Inventory Request Submission and Delivery Cadence document for detailed guidance.
- Inventory requests submitted via VAMS on Mondays no later than 11:59pm.
- Inventory shipments documented in VAMS same day as shipment receipt.
- All inventory waste and transfers documented in VAMS within 24 hours of occurrence.
  - All transfers documented on COVID-19 Transport Log.
## COVID-19 Vaccine Expiration Dates

<table>
<thead>
<tr>
<th>Pfizer Vaccine</th>
<th>Moderna Vaccine</th>
<th>Janssen Vaccine</th>
</tr>
</thead>
<tbody>
<tr>
<td>This vaccine product has an expiration date located on the vaccine vial. CDC</td>
<td>The expiration date is NOT printed on the vaccine vial or carton. To determine the expiration date: • Scan the QR code located on the outer carton, or • Go to <a href="http://www.modernatx.com/covid19vaccine-eua/">www.modernatx.com/covid19vaccine-eua/</a>.</td>
<td>The expiration date is NOT printed on the vaccine vial or carton. To determine the expiration date: • Scan the QR code located on the outer carton • Call 1-800-565-4008, or • Go to <a href="http://www.vaxcheck.jnj/">www.vaxcheck.jnj/</a></td>
</tr>
</tbody>
</table>

CDC’s [COVID-19 Vaccine Expiration Date Tracking Tool](http://www.modernatx.com/covid19vaccine-eua/) can help providers keep track of the expiration date by lot number.
VAMS Inventory Requests

• Inventory requests must be submitted in VAMS on Mondays by 11:59pm to be considered for the next ordering/shipping cycle

• Please refer to DHEC’s Inventory Management, Inventory Request Submission and Delivery Cadence document for detailed guidance

VAMS Inventory Request Submission

• DHEC processes CDC vaccine orders once a week; DHEC receives separate federal allocations for 1st and 2nd doses and must order these separately

• Please see the VAMS Inventory Manager User Manual to step-by-step guidance

• All providers must submit inventory requests in VAMS on Mondays by 11:59pm for consideration for new deliveries
  
  o Moderna, Janssen and Pfizer Direct Ship
    
    - Only one (1) new inventory request should be submitted per week
    - Organizations ordering on behalf of multiple sites should only submit a request via the ordering organization’s VAMS account
    - DHEC only processes inventory requests based on “date requested”. The “date required by” is not considered for processing for direct shipments as final vaccine order delivery arrivals are contingent on the manufacturer and transportation/delivery companies processing timelines
  
  o Include Total Amount of 1st and 2nd doses in the requested amount

  o Specify the amount of 1st and 2nd doses in the notes section; if 0 for either, please specify

• Please note:
  
  o Inventory requests are NOT guaranteed and are not considered orders
  
  o 2nd dose requests based on 1st dose shipments are guaranteed by DHEC

  o DHEC will post updates concerning final allocation amounts to inventory requests once determinations have been made

  o The requesting user should select the + Follow button of the inventory request to receive email updates when information is posted from DHEC. The requesting VAMS user will need to make a comment on the inventory request in order to enable the automatic email notification system.

  o DHEC staff will update pending inventory requests with a status update

Federal Ancillary supply kits: Pfizer

DHEC will deliver additional ancillary supply kits to support Pfizer vaccine administration

- Adhesive bandages
- Gloves
- Cotton balls
- Surgical face masks

- needles (22-25G X 1”)
- needles (22-25G X 1.5”)
- mixing needles (21-25G X 1.5”)
- syringes (1mL)
- syringes (3mL or 5mL)
- alcohol pads
- vaccination record cards
- needle gauge and length charts
- face shields
- surgical masks
- diluent vials
Federal ancillary supply kits: Moderna and Janssen

Sites receiving Moderna and Janssen direct shipments will automatically receive federal ancillary supply kits that will contain the supplies contained in the image to the right. Please consult the Product Information Guide for more information.
Vaccine Order and Ancillary Supply Delivery Cadence

*all anticipated delivery dates are subject to change and are tentative*

Ancillary Supplies

• Important to keep ancillary supplies for the vaccine shipments separate from existing ancillary supplies at the facility

• Refer to the Product Information Guide for COVID-19 Vaccines and Associated Products for more information about federally-supplied ancillary kits
Vaccine Adverse Event Reporting System (VAERS)

All COVID-19 vaccine providers must report any suspected moderate or severe reactions post COVID-19 vaccine administration and/or vaccine administration errors to VAERS.
• Smartphone-based text messaging program designed for vaccine recipients

• Recipients can opt-in and quickly tell CDC if they have any side effects

• Providers must post v-safe poster during vaccination events and share information

• See DHEC’s COVID-19 provider website to download v-safe poster and information sheets.
Key resources

• CDC’s Interim Clinical Considerations for use of COVID-19 Vaccines Currently Authorized in the United States
  • https://www.cdc.gov/vaccines/covid-19/info-by-product/clinical-considerations.html
  • Sign up for email updates when content changes

• All COVID-19 Vaccination Clinician Resources
  • https://www.cdc.gov/vaccines/covid-19/index.html
CDC Clinician On-Call Center

If a healthcare professional at your facility has clinical guidance needs, please contact:

• **Clinician On-Call Center:**
  • Call 800-CDC-INFO (800-232-4636) and ask for the Clinician On-Call Center.
  • Email: eocevent168@cdc.gov

• The Clinician On-Call Center is a 24-hour hotline with trained CDC clinicians standing by to answer COVID-19 questions from healthcare personnel on a wide range of topics, such as diagnostic challenges, clinical management, and infection prevention and control.
Vaccine Administration
Administration of COVID-19 vaccines: At-a-Glance

- COVID-19 vaccines are administered intramuscularly as either a two-dose series or single dose.
- One valid vaccination series should be completed.

<table>

Administration:
Second Dose Strategies

• Provide a COVID-19 vaccination record card to all vaccine recipients, asking recipients to bring their card to their appointment for the second dose, and encouraging recipients to make a backup copy (e.g., by taking a picture of the card on their phone).

• Encourage all vaccine recipients to enroll in VaxText, a free text message-based platform to receive COVID-19 vaccination second-dose reminders.

• DHEC requires that providers make an appointment for the second dose before the vaccine recipient leaves to increase the likelihood that patients will present at the same vaccination site for the second dose.
Administration: Second Dose Considerations

• Persons should not be routinely scheduled to receive the second dose earlier than recommended.
  • However, second doses administered within a grace period of 4 days earlier than the recommended date for the second dose are still considered valid. Doses inadvertently administered earlier than the grace period should not be repeated.

• The second dose should be administered as close to the recommended interval as possible.
  • However, if it is not feasible to adhere to the recommended interval and a delay in vaccination is unavoidable, the second dose may be administered up to 6 weeks (42 days) after the first dose.
  • There are currently limited data on efficacy of COVID-19 vaccines administered beyond this window.
  • If the second dose is administered beyond these intervals, there is no need to restart the series
Interchangeability with other COVID-19 products

• Currently authorized COVID-19 vaccines can be used when indicated; ACIP does not state a product preference.
• However, COVID-19 vaccines are not interchangeable.
  • The safety and efficacy of a mixed-product series have not been evaluated.
• Both doses of the series should be completed with the same product.
  • However, if two doses of different mRNA COVID-19 vaccine products are inadvertently administered, no additional doses of either product are recommended at this time.
Interchangeability with other COVID-19 products:
Exceptional Situations

• In exceptional situations in which the first-dose vaccine product cannot be determined or is no longer available, any available COVID-19 vaccine may be administered at a minimum interval of 28 days between doses to complete the mRNA COVID-19 vaccination series.

• If two doses of different mRNA COVID-19 vaccine products are administered in these situations (or inadvertently), no additional doses of either product are recommended at this time.
Coadministration with other vaccines

• COVID-19 vaccines should be administered alone, with a minimum interval of 14 days before or after administration with any other vaccines.

• If COVID-19 vaccines are inadvertently administered within 14 days of another vaccine, doses do not need to be repeated for either vaccine.
COVID-19 Vaccination and SARS-CoV-2 infection
Vaccination of persons with SARS-CoV-2 infection or exposure

• **Persons with prior history of SARS CoV-2-infection**
  • Vaccination should be offered to persons regardless of history of prior symptomatic or asymptomatic SARS-CoV-2 infection.
  • Viral testing for current infection, or serologic testing for prior infection, is not recommended for the purpose of vaccine decision-making
Vaccination of persons with SARS-CoV-2 infection or exposure

- **Persons with current SARS CoV-2-infection**
  - Vaccination should be deferred until recovery from acute illness (if person had symptoms) and criteria have been met to discontinue isolation
  - No minimal interval between infection and vaccination
  - Current evidence suggests that reinfection is uncommon in the months after initial infection, thus while vaccine supply remains limited, persons with recent documented infection may choose to temporarily delay vaccination
Vaccination of persons who previously received passive antibody therapy for COVID-19

• Currently no data on safety and efficacy of COVID-19 vaccination in persons who received monoclonal antibodies or convalescent plasma as part of COVID-19 treatment

• Vaccination should be deferred for at least 90 days to avoid interference of the passive antibody therapy with vaccine-induced immune responses

• Recommendation does not apply to persons receiving antibody therapies not specific to COVID-19 treatment
COVID-19 Vaccination of Special Populations
Vaccination of persons with underlying medical conditions

- Any currently authorized COVID-19 vaccine can be administered to persons with underlying medical conditions who have no contraindications to vaccination, including:
  - Immunocompromised persons
  - Persons with autoimmune conditions
  - People with history of Guillain-Barre syndrome, Bell’s palsy, dermal filler use
- Clinical trials demonstrate similar safety and efficacy profiles in persons with underlying medical conditions, including those that place them at increased risk for severe COVID-19, compared to persons without comorbidities
COVID-19 vaccination of immunocompromised persons

- Persons with HIV infection, other immunocompromising conditions, or who take immunosuppressive medications or therapies might be at increased risk for severe COVID-19
- Immunocompromised persons may receive COVID-19 vaccine unless otherwise contraindicated
  - All currently authorized vaccines are inactivated vaccines
- Individuals should be counseled about
  - Unknown vaccine safety and efficacy profiles in immunocompromised persons
  - Potential for reduced immune responses
  - Need to continue to follow current guidance to protect themselves against COVID-19
Vaccination of pregnant women

• There are limited data on safety of COVID-19 vaccines in pregnant people

• Currently authorized COVID-19 vaccines are all inactivated vaccines. **Based on current knowledge, experts believe that COVID-19 vaccines are unlikely to pose a risk to the pregnant person or the fetus.**

• If pregnant people are part of a group that is recommended to receive a COVID-19 vaccine, **they may choose to be vaccinated.**
  • A conversation between the patient and their clinical team may assist with decisions regarding the use of a mRNA COVID-19 vaccine, though a conversation with a healthcare provider is not required prior to vaccination.

• There is **no recommendation for routine pregnancy testing** before receipt of a COVID-19 vaccine. Those who are trying to become pregnant do not need to avoid pregnancy after mRNA COVID-19 vaccination.
Management of allergic reactions

• Appropriate medical treatment used to manage immediate allergic reactions must be immediately available in the event that an acute anaphylactic reaction occurs following administration of an mRNA COVID-19 vaccine.

• Vaccine providers should observe patients with a history of anaphylaxis (due to any cause) for 30 minutes after vaccination.

• All other persons should be observed for 15 minutes after vaccination to monitor for the occurrence of immediate adverse reactions.

• Review CDC’s Considerations: Preparing for the Potential Management of Anaphylaxis at COVID-19 Vaccination Sites
Contraindications and precautions for COVID-19 vaccines

<table>
<thead>
<tr>
<th>CONTRAINDICATION TO VACCINATION</th>
<th>PRECAUTION TO VACCINATION</th>
<th>MAY PROCEED WITH VACCINATION</th>

</tbody>
</table>

*See Appendix C for a list of ingredients. Persons with a contraindication to one of the mRNA COVID-19 vaccines should not receive doses of either of the mRNA vaccines (Pfizer-BioNTech or Moderna).

*Immediate allergic reaction to a vaccine or medication is defined as any hypersensitivity-related signs or symptoms consistent with urticaria, angioedema, respiratory distress (e.g., wheezing, stridor), or anaphylaxis that occur within four hours following administration.

*Includes persons with a reaction to a vaccine or injectable therapy that contains multiple components, one of which is a vaccine component, but in whom it is unknown which component elicited the immediate allergic reaction.

*Polyethylene glycol (PEG) is an ingredient in both mRNA COVID-19 vaccines, and polysorbate 80 is an ingredient in Janssen COVID-19 vaccine. PEG and polysorbate are structurally related, and cross-reactive hypersensitivity between these compounds may occur. Persons with a contraindication to mRNA COVID-19 vaccines (including due to a known [diagnosed] allergy to PEG) have a precaution to Janssen COVID-19 vaccine. Among persons who received one mRNA COVID-19 dose but for whom the second dose is contraindicated, consideration may be given to vaccination with Janssen COVID-19 vaccine (administered at least 28 days after the mRNA COVID-19 dose). Persons with a contraindication to Janssen COVID-19 vaccine (including due to a known [diagnosed] allergy to polysorbate) have a precaution to mRNA COVID-19 vaccines. In patients with these precautions, vaccination should be undertaken in an appropriate setting under the supervision of a health care provider experienced in the management of severe allergic reactions. Consider referral to allergist-immunologist.
