Re: Extension of submission deadline for Work Plan

4210 Azalea Drive, SCDHEC Site ID 400059
Consent Agreement 010-180-W
Charleston County

Dear Mr. Burris:

In its review of the Groundwater Monitoring Report, March 2017 Sampling dated April 2017 the South Carolina Department of Health and Environmental Control (the Department) directed you to submit a work plan for collection of indoor air samples on or before November 30, 2017. The Department further indicated that a work plan for complete delineation of the groundwater contaminant plume should be submitted on or before January 31, 2018.

During a phone conversation on December 14, 2017, your consultant, Michael Muthig of IPGX indicated that he was drafting a plan to address both the vapor intrusion and groundwater concerns. In subsequent email correspondence Mr. Muthig projected submission of a work plan by the end of March. Further email correspondence has suggested that there have been some discussions with neighboring property owners, however details were somewhat vague and the Department has not received a work plan at this time. Given the need to coordinate activities with the adjacent businesses, the Department is extending the deadline for the combined work plan to June 30, 2018.

Please note that the adjacent property owner (Brenntag Southeast) has scheduled groundwater sampling and remedial pilot testing for the week of June 4. It is my hope that activities at both sites can be coordinated to provide a clearer understanding of overall site conditions and a more productive path toward site closure.

Please contact me if you would like to set up a meeting with the Department or to discuss this project.

Kindest Regards,

Tim Hornosky, P.G., Project Manager
Voluntary Cleanup Section
Division of Site Assessment, Remediation & Revitalization
