Wastewater - NPDES GENERAL Permit Group - New
version 1.23
(Submission #: HP8-VQBV-NFGV7, version 2)

Details

Submission ID HP8-VQBV-NFGV7
Submission Reason New

Form Input

Application Information

What general permit coverage are you applying for?
SCG730000 - Discharges Associated with Nonmetal Mineral Mining Facilities

Do you currently have coverage under an existing general permit?
No

List any other NPDES or ND permit numbers for this site.
none

CORRECTION REQUEST (CORRECTED)

Owner’s info

The owner's name is typically the company only and not a person unless there is a sole proprietor of the company. Therefore, you will need to modify the submittal to remove the person's name and title and only list the organization name. The Company/Organization name also needs to be exactly as it is registered with South Carolina Secretary of State's Office (Inc., LLC, Company etc...). After you make the correction, please mark it complete and resubmit. If the owner is a sole proprietor, no changes need to be made to this section so just resubmit. Thanks Patty

Created on 6/14/2021 3:59 PM by Patty Barnes

Owner Employer Identification Number (EIN)

- 540630628

Is Facility Operated by Owner?

- Yes

Facility Type

- Private

Wastewater Treatment Plant Location (1 of 1)

Enoree Development

Treatment Plant Site Name:
Enoree Development

Does your facility treat or store wastewater and/or sludge?
No

Outfall/Land Application Site Location (1 of 10)

Please ensure Stormwater outfalls are identified.

Is this an outfall or land application site?
Outfall

Outfall number/Land Application Field Name
SW-001

Definitions of Discharge Types
1) Storm Water Associated with the Industrial Activity of Mining means storm water runoff, snow melt runoff, and surface runoff and drainage from facilities classified as Standard Industrial Classification 14 (non-metallic mineral industry) including active or inactive mining operations that discharge storm water contaminated by contact with or that has come into contact with, any overburden, raw material, intermediate products, finished products, byproducts or waste products located on the site of such operations. Inactive mining operations are mining sites that are not being actively mined, but which have an identifiable owner/operator; inactive mining sites do not include sites where mining claims are being maintained prior to disturbances associated with the extraction, beneficiation, or processing mined materials, nor sites where minimal activities are undertaken for the sole purpose of maintaining a mining claim.

2) Mine Dewatering is any water that is impounded or that collects in the mine and is pumped, drained or otherwise removed from the mine through the efforts of the mine operator. This term shall also include wet pit overflows caused solely by direct rainfall and ground water seepage. However, if a mine is also used for treatment of mine process generated wastewater, discharges of commingled water from the mine shall be deemed discharges of mine process generated wastewater.
3) Process-Generated Wastewater: is any wastewater used in the slurry transport of mined material, air emissions control (excluding water used for dust suppression on roads which is evaporated or absorbed by soils such that no runoff to a receiving stream occurs), or processing exclusive of mining. The term shall also include any other water, which becomes commingled with such wastewater in a pit, pond, lagoon, mine or other facility used for treatment of such wastewater.

4) Mine Equipment Wash Water means wastewater generated by washing mine equipment (including trucks) used in onsite mining operations. To qualify as mine equipment wash water under this general permit any soaps or detergents used for washing must be biodegradable and phosphate-free.

5) Suction Dredge Water means wastewater generated from suction dredging in sand or gravel dredge mining operations conducted in surface waters classified as Waters of the State and subsequently processed onshore to extract the sand or gravel. Suction dredge waters generated from dredging operations conducted in a mine pit are not included in this definition.

Discharge Type
1) Storm Water Associated with the Industrial Activity of Mining

What is the average flow (or design flow for Domestic Facilities or Water Treatment Plants) in GPD?
755000

Outfall/Land Application Site Location
34.675833,-81.948056

Is the receiving stream an unnamed tributary to a named waterbody?
Yes

Receiving Water (Please type none for land application sites)
Enoree River

Describe the discharge flow path from the point it exits the system to the point it enters the receiving water, identifying the distance in feet and specifying if the discharge flows through a stormwater pond.
Stormwater runoff is collected in sediment basin P1-SB-1 before discharging through a barrel and riser to a riprap lined channel that conveys water to the property line, eventually reaching the Enoree River.

Indicate if easements have been obtained for any conveyances of the discharge not on property of the permittee, which are not waters of the State.
NA

Describe all operations that contribute wastewater to the discharge and any treatment that is provided.
All water discharged is stormwater runoff from the perimeter of the quarry area.

Outfall/Land Application Site Location (2 of 10)

Please ensure Stormwater outfalls are identified.

Is this an outfall or land application site?
Outfall

Outfall number/Land Application Field Name
SW-002

Inactive mining operations are mining sites that are not being actively mined, but which have an identifiable owner/operator; inactive mining sites do not include sites where mining claims are being maintained prior to disturbances associated with the extraction, beneficiation, or processing mined materials, nor sites where minimal activities are undertaken for the sole purpose of maintaining a mining claim.

2) Mine Dewatering is any water that is impounded or that collects in the mine and is pumped, drained or otherwise removed from the mine through the efforts of the mine operator. This term shall also include wet pit overflows caused solely by direct rainfall and ground water seepage. However, if a mine is also used for treatment of mine process generated wastewater, discharges of commingled water from the mine shall be deemed discharges of mine process generated wastewater.

3) Process-Generated Wastewater: is any wastewater used in the slurry transport of mined material, air emissions control (excluding water used for dust suppression on roads which is evaporated or absorbed by soils such that no runoff to a receiving stream occurs), or processing exclusive of mining. The term shall also include any other water, which becomes commingled with such wastewater in a pit, pond, lagoon, mine or other facility used for treatment of such wastewater.

4) Mine Equipment Wash Water means wastewater generated by washing mine equipment (including trucks) used in onsite mining operations. To qualify as mine equipment wash water under this general permit any soaps or detergents used for washing must be biodegradable and phosphate-free.
washing must be biodegradable and phosphate-free.

5) Suction Dredge Water means wastewater generated from suction dredging in sand or gravel dredge mining operations conducted in surface waters classified as Waters of the State and subsequently processed onshore to extract the sand or gravel. Suction dredge waters generated from dredging operations conducted in a mine pit are not included in this definition.

**Discharge Type**

1) Storm Water Associated with the Industrial Activity of Mining

**What is the average flow (or design flow for Domestic Facilities or Water Treatment Plants) in GPD?**

755000

**Outfall/Land Application Site Location**

34.668403,-81.946357

Is the receiving stream an unnamed tributary to a named waterbody?

Yes

**Receiving Water (Please type none for land application sites)**

Enoree River

Describe the discharge flow path from the point it exits the system to the point it enters the receiving water, identifying the distance in feet and specifying if the discharge flows through a stormwater pond.

Stormwater runoff is collected in sediment basin SE-SB-2 before discharging through a barrel and riser to a riprap lined channel that conveys water to an unnamed stream, eventually reaching the Enoree River.

Indicate if easements have been obtained for any conveyances of the discharge not on property of the permittee, which are not waters of the State.

NA

Describe all operations that contribute wastewater to the discharge and any treatment that is provided.

All water discharged is stormwater runoff from the overburden storage area.

**Outfall/Land Application Site Location (9 of 10)**

Please ensure Stormwater outfalls are identified.

Is this an outfall or land application site?

Outfall

Outfall number/Land Application Field Name

009

**Definitions of Discharge Types**

1) Storm Water Associated with the Industrial Activity of Mining means storm water runoff, snow melt runoff, and surface runoff and drainage from facilities classified as Standard Industrial Classification 14 (non-metallic mineral industry) including active or inactive mining operations that discharge storm water contaminated by contact with or that has come into contact with, any overburden, raw material, intermediate products, finished products, byproducts or waste products located on the site of such operations. Inactive mining operations are mining sites that are not being actively mined, but which have an identifiable owner/operator; inactive mining sites do not include sites where mining claims are being maintained prior to disturbances associated with the extraction, beneficiation, or processing mined materials, nor sites where minimal activities are undertaken for the sole purpose of maintaining a mining claim.

2) Mine Dewatering is any water that is impounded or that collects in the mine and is pumped, drained or otherwise removed from the mine through the efforts of the mine operator. This term shall also include wet pit overflows caused solely by direct rainfall and ground water seepage. However, if a mine is also used for treatment of mine process generated wastewater, discharges of commingled water from the mine shall be deemed discharges of mine process generated wastewater.

3) Process-Generated Wastewater: is any wastewater used in the slurry transport of mined material, air emissions control (excluding water used for dust suppression on roads which is evaporated or absorbed by soils such that no runoff to a receiving stream occurs), or processing exclusive of mining. The term shall also include any other water, which becomes commingled with such wastewater in a pit, pond, lagoon, mine or other facility used for treatment of such wastewater.

4) Mine Equipment Wash Water means wastewater generated by washing mine equipment (including trucks) used in onsite mining operations. To qualify as mine equipment wash water under this general permit any soaps or detergents used for washing must be biodegradable and phosphate-free.
5) Suction Dredge Water means wastewater generated from suction dredging in sand or gravel dredge mining operations conducted in surface waters classified as Waters of the State and subsequently processed onshore to extract the sand or gravel. Suction dredge waters generated from dredging operations conducted in a mine pit are not included in this definition.

Discharge Type
1) Storm Water Associated with the Industrial Activity of Mining
3) Process-Generated Wastewater
2) Mine Dewatering

What is the average flow (or design flow for Domestic Facilities or Water Treatment Plants) in GPD?
1510000

Outfall/Land Application Site Location
34.670428,-81.949178

Is the receiving stream an unnamed tributary to a named waterbody?
Yes

Receiving Water (Please type none for land application sites)
Enoree River

Describe the discharge flow path from the point it exits the system to the point it enters the receiving water, identifying the distance in feet and specifying if the discharge flows through a stormwater pond.
Stormwater runoff is collected in sediment basin W-SB-1 before discharging through a barrel and riser to a riprap lined channel that conveys water to an unnamed stream, eventually reaching the Enoree River. Sediment basin W-SB-1 will also collect water from active plant operations and mine pit dewatering.

Indicate if easements have been obtained for any conveyances of the discharge not on property of the permittee, which are not waters of the State.
NA

Describe all operations that contribute wastewater to the discharge and any treatment that is provided.
Water discharged is stormwater runoff from active plant operations, storage piles, and mine pit dewatering.

Outfall/Land Application Site Location (10 of 10)

Please ensure Stormwater outfalls are identified.

Is this an outfall or land application site?
Outfall

Outfall number/Land Application Field Name
SW-010

NA

Describe all operations that contribute wastewater to the discharge and any treatment that is provided.
Water discharged is stormwater runoff from product storage piles.

Mining - NPDES - GP

Please see link below for the General Permit.
NPDES General Permit for discharges Associated with Nonmetal Mineral Mining Facilities

Please see link below for DHEC form 3559 (Notice of Intent)
Notice of Intent (NOI) NPDES General Permit for Discharges Associated with Nonmetallic Mineral Mining Facilities
SCG730000

Is this site exempt from the Mining Act?
No

Mining Permit Number
I-002335

Materials to be Mined (If material is mined solely as fill dirt, enter fill dirt and not "sand" or "clay").
Granite/Gneiss

Total number of acres to be affected by the mining activity
255.8

Mining - NPDES - GP - Required Documents

Map Specifications
Provide a map of the site that shows the following:

1) The property boundary and all areas that will be affected by mining activities (i.e. the pits or excavation areas, overburden areas, material stockpiles, etc.).

2) Location of planned access and haul roads on the area to be affected.
3) Location and name (if appropriate) of streams, lakes, wetlands and existing drainage ditches within the area to be permitted. Use arrows to indicate direction of water flow in such streams and drainage ditches.

4) A legend showing the name of applicant, name of the proposed mine, north arrow, county, scale, date of preparation and name and title of the person who prepared the site map.

5) Identify the locations of the outfalls.

Do you have any data on the quality of the discharge?
No

Comment
A mine permit application was recently submitted for this site.

Stormwater Pollution Prevention Plan
The Stormwater Pollution Prevention Plan (SWPPP) must be prepared in accordance with the requirements of Part VIII.C of the NPDES General Permit for Discharges Associated with Nonmetal Mineral Mining Facilities.

The SWPPP must be prepared prior to the submittal of this Notice of Intent. See the SWPPP requirements in Part VIII.C of the NPDES general permit.
Click here to view the NPDES General Permit

Indicate whether the SWPPP has been prepared. The SWPPP must be prepared prior to submittal of this NOI.
Yes

Additional Information and Fee

NOI Coverage
100

Total Fee
100

SUBMISSION AGREEMENTS

✔️ I am the owner of the account used to perform the electronic submission and signature.

✔️ I have the authority to submit the data on behalf of the facility I am representing.

✔️ I agree that providing the account credentials to sign the submission document constitutes an electronic signature equivalent to my written signature.

✔️ I have reviewed the electronic form being submitted in its entirety, and agree to the validity and accuracy of the information contained within it to the best of my knowledge.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. I will not discharge under this General Permit until I receive authorization from the Department.
