Below is a list of provider types (facilities, services, and professionals) where DHEC may investigate complaints of potential state and/or federal regulatory violations. DHEC’s state regulations for the applicable providers can be found on the DHEC Regulations Table. Also, on behalf of the federal Centers of Medicare and Medicaid Services (CMS), DHEC certifies providers meet the CMS Conditions of Participation for the federal Medicare and Medicaid programs. As noted below, “state” means DHEC enforcing state licensing standards and “federal” means DHEC enforcing federal Medicare certification standards on behalf of CMS. These standards also include, among other standards, food protection and fire and life safety codes for providers, where applicable.

- Abortion Clinics (state)
