**Dairy Farm Inspection Report**

**Bureau of Environmental Health Services**

**NAME AND LOCATION OF DAIRY FARM**

Inspection of your dairy farm today showed violations existing in the Items checked below. You are further notified that this inspection report serves as notification of the intent to suspend your permit if the violations noted are not in compliance at the time of the next inspection.

### COWS

1. Abnormal Milk:
   - Cows secreting abnormal milk milked last in or in separate equipment. (a)
   - Abnormal milk properly handled and disposed of. (b)
   - Proper care of abnormal milk handling equipment. (c)

### MILKING BARN, STABLE, OR PARLOR

2. Construction:
   - Floors, gutters, and feed troughs of concrete or equally impervious materials; in good repair. (c)
   - Walls and ceilings smooth, painted or finished adequately; in good repair; ceiling dust-tight. (b)
   - Separate stalls or pens for horses, calves, and bulls; no overcrowding. (c)
   - Adequate natural and/or artificial light; well distributed. (d)
   - Properly ventilated. (e)

3. Cleanliness:
   - Clean and free of litter. (a)
   - No swine or fowl. (b)

4. Cowyard:
   - Graded to drain; no pooled water or wastes. (a)
   - Cowyard clean; cattle housing areas and manure packs properly maintained. (b)
   - No swine. (b)
   - Manure stored inaccessible to cows. (b)

### MILKHOUSE OR ROOM

5. Construction and Facilities:
   - Floors
     - Smooth, concrete or other impervious material; in good repair. (a)
     - Graded to drain. (a)
     - Drains trapped, if connected to sanitary system. (b)
   - Walls and Ceilings
     - Approved material and finish. (a)
     - Good repair (windows, doors, and support included). (b)
   - Lighting and Ventilation
     - Adequate natural and/or artificial light properly distributed. (a)
     - Adequate ventilation. (a)
     - Doors and windows closed during dusty weather. (b)
   - Vents and lighting fixtures properly insulated. (c)

### MISCELLANEOUS REQUIREMENTS

- Used for milkhouse operations only; sufficient size. (a)
- No direct opening into living quarters or barn, except as permitted by regulation. (a)
- Waste properly disposed of. (a)
- Proper haycoop where required. (a)
- Acceptable surface under haycoop. (a)
- Suitable shelter or direct load for transport trucks as required. (a)

### TRANSFER/PROTECTION OF MILK

14. Protection From Contamination:
   - No overconcentration. (a)
   - Product and CIP cleaning circuits separated. (a)
   - Improperly handled milk discarded. (a)
   - Immediate removal of milk. (b)
   - Milk and equipment properly protected. (c)
   - Sanitized milk surfaces not exposed to contamination. (c)
   - Air under pressure of proper quality. (c)

15. Drug and Chemical Control:
   - Cleaners and sanitizers properly identified. (a)
   - Drug administration equipment properly handled and stored. (a)
   - Drugs properly labeled (name and address) and stored. (a)
   - Drug properly labeled (directions for use, cautionary statements, active ingredient). (a)
   - Drugs properly used and stored to prevent contamination of milk or milk product contact surfaces. (a)

### PERSONNEL

16. Handwashing Facilities:
   - Proper handwashing facilities convenient to milking operations. (a)
   - Wash and rinse vats not used as handwashing facilities. (b)

17. Personnel Cleanliness:
   - Hands washed clean and dried before milking, or performing milkhouse functions; rewash when contaminated. (a)
   - Clean outer garments worn. (b)

### COOLING

18. Cooling:
   - Milk cooled to 45°F (7°C) or less within 2 hours after milking, except as permitted by regulation. (a)
   - Recirculated cooling water from a safe source and properly protected; complies with bacteriological standards. (b)
   - An acceptable recording device shall be installed and maintained when required. (c)

### PEST CONTROL

19. Insect and Rodent Control:
   - Flying minimized by approved manure disposal methods (Refer to regulation). (a)
   - Manure packs properly maintained. (b)
   - All milkhouse openings effectively screened or otherwise protected; doors tight and self-closing; screen doors open outward. (c)
   - Milkhouse free of insects and rodents. (d)
   - Approved pesticides; used properly. (e)
   - Equipment and utensils not exposed to pesticide contamination. (a)
   - Surroundings neat and clean; free of harborage and breeding areas. (b)
   - Feed storage not attraction for birds, rodents or insects. (b)

### REMARKS

If additional space is required, please place information on the back of this Form.
