## Flu Watch

MMWR Week 48: November 28 to December 4, 2021
S.C. Department of Health and

Environmental Control

## Virologic Surveillance

This week 696 lab-confirmed tests were reported. In the current flu season, there have been 1655 lab-confirmed tests reported.

Influenza Indicators

| Influenza <br> Indicator | Change from <br> Previous Week |
| :--- | :---: |
| Lab-confirmed <br> tests | Increased |
| ILI Percent | Increased |
| Hospitalizations | Increased |

## Influenza-Associated Hospitalizations

This week 25 influenza-associated hospitalizations were reported by 40 hospitals. The cumulative hospitalization rate is $\mathbf{1 . 2}$ per 100,000. In the current flu season, there have been 63 influenza-associated hospitalizations.

## Influenza-Associated Deaths

This week $\mathbf{0}$ influenza-associated deaths were reported. The cumulative mortality rate is $\mathbf{0 . 0}$ per 100,000. In the current flu season, there have been $\mathbf{2}$ influenza-associated deaths.

## Virologic Surveillance

| Lab-Confirmed Influenza Cases by Influenza Type to Date* |
| :--- |

*Data presented from previous influenza seasons represents the data from that season through the same week as the current season. Nationally, the influenza season begins with MMWR week 40 and ends with MMWR week 39. The 2021-22 influenza season began on October 3, 2021 and will end on October 1, 2022.
**NS - not subtyped +LND - lineage not determined
${ }^{5}$ Cases with more than one influenza $A$ subtype in the same sample or with influenza $A$ and $B$ viral types in the same sample simultaneously.
${ }^{\text {E }}$ Lab-confirmed influenza cases who also tested positive for SARS-CoV-2 virus from specimens collected on the same date
Laboratory-Confirmed Influenza Cases, by Virus Type

## Influenza-Like IIIness (ILI) Surveillance

This week, the ILI activity level was moderate and 3.1\% of patient visits to SC ILINet providers were attributed to an influenza-like illness. This is below the state baseline of 3.6\%.

Reports were received from providers in $\mathbf{2 2}$ counties, representing all DHEC Public Health regions.
**ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.**

Percentage of Influenza-like Illness (ILI) Visits Reported by Sentinel Providers for Past and Current Seasons

State ILI Activity Level by MMWR Week, 2016-17 Influenza
