

NOTICES

REQUEST FOR INFORMATION

Background:

It is the intent of the South Carolina Department of Health and Environmental Control (SC DHEC) to procure a web-based performance management information system. The system should provide industry standard functionality to managing a balanced scorecard and support DHEC's strategic planning efforts for both internal and external stakeholders. SC DHEC is partnering with the South Carolina Hospital Association (SCHA) to track measures related to the State Health Improvement Plan, so DHEC's chosen system must integrate with the existing Clear Impact system.

Requirements:

The requirements listed herein are minimum requirements and may not encompass all system requirements.

- Must be a SaaS solution.
- Must integrate with existing Clear Impact© system.
- Must have the ability to import and export data.
- Must have multi-departmental (30) concurrent user access.
- Must have a minimum AES-256 encryption.

Goals:

DHEC is seeking feedback from vendors to help us determine:

- Does an off-the-shelf product exist? If so,
 - Can the product be customized to meet DHEC's needs?
- Will a fully developed and implemented system be required?
- Please provide a base price for the system you propose.

Please note this Request for Information (RFI) is not a Request for Proposal (RFP). DHEC is not seeking to contract with vendors for these services or products at this time. The purpose of this RFI is to gather market information about available systems. A formal solicitation may be issued at a future date based in part on information gathered during this RFI process.

Please provide responses to shealytv@dhec.sc.gov no later than 5 pm ET on November 8, 2022.
