

Recent Disease Activity, by County

As of 12.22.2021

CDC recommends that decisions should be made at the state and local level, in collaboration with public health officials who can help determine the level of transmission in the community. DHEC is providing this county-level data about disease transmission to support decision-making at the local level. It is not meant to be a stand-alone document.

Metrics and Categorizations:

- **Two - week Incidence Rate:** the number of new confirmed and probable cases in the prior two weeks (December 8, 2021 – December 21, 2021) per 100,000 people. This metric provides the recent incidence of COVID-19 infections in that county. Categorization (# cases/100,000 people):
 - **Low: 0 – 50**
 - **Medium: 51 – 200**
 - **High: \geq 201**
- **Trend in Incidence Rate:** whether the two-week incidence rate is increasing, decreasing, or stable compared to the previous two weeks. For purposes of this assessment, consider the trends to be equivalent to:
 - **Decreasing by at least 10% = Low**
 - **Stable = Medium**
 - **Increasing by at least 10%= High**
- **Two-Week Percent Positive Rate:** the percentage of positive molecular tests out of the number of molecular (swab, or PCR) tests performed in the last two weeks for each county. The metric takes into consideration the number of tests performed for residents of the county in the previous two weeks. Categorization:
 - **Low: \leq 5.0%**
 - **Medium: 5.1% - 9.9%**
 - **High: \geq 10.0%**

Recent Disease Activity, by County

As of 12.22.2021

How to Calculate the Disease Activity for your County:

- I. Locate your county on the following table and read across for each of the three categories listed: incidence rate, trend in incidence rate, and percent positive.
 - 1) **Example: York County**
 - 1) Incidence Rate = High
 - 2) Trend in Incidence Rate = High
 - 3) Percent Positive Rate = High
- II. If the rates are the same in each of the three categories, as they are in the example of York County, then the overall disease assessment is as it appears.
 - 1) **Example: York County = High**
- III. If the rates are not the same in each category, take the average of them.
 - 1) **Example: Marion County:**
 - 1) Incidence Rate = Medium
 - 2) Trend in Incidence Rate = High
 - 3) Percent Positive Rate = Low
 - 1) There is one metric that is High, one that is Medium, and one that is Low, so the disease activity level overall is Medium.
 - 2) **Example: Laurens County:**
 - 1) Incidence Rate = High
 - 2) Trend in Incidence Rate = High
 - 3) Percent Positive Rate = Medium
 - 1) There are two metrics that are High and one that is Medium, so the disease activity level overall is High.

COVID-19 Recent Disease Activity, by County

As of 11:59 PM on 12/21/2021

0 Counties have **Low** Recent Disease Activity
19 Counties have **Medium** Recent Disease Activity
27 Counties have **High** Recent Disease Activity

Recent Disease Activity, by County

As of 12.22.2021

| County | Incidence Rate (per 100,000) | | Trend in Incidence Rate | Percent Positive | |
|--------------|------------------------------|-------|-------------------------|------------------|-------|
| Abbeville | High | 540.9 | High | Medium | 7.9% |
| Aiken | Medium | 193.8 | High | Medium | 6.2% |
| Allendale | High | 264.1 | High | Low | 2.5% |
| Anderson | High | 447.3 | High | Medium | 7.6% |
| Bamberg | Medium | 194.2 | High | Medium | 6.0% |
| Barnwell | Medium | 149.0 | High | Low | 3.7% |
| Beaufort | Medium | 189.6 | High | Medium | 6.0% |
| Berkeley | High | 224.6 | High | Medium | 7.9% |
| Calhoun | Medium | 137.4 | High | Medium | 5.7% |
| Charleston | High | 306.0 | High | Medium | 5.4% |
| Cherokee | High | 211.1 | Medium | Medium | 6.3% |
| Chester | High | 474.7 | High | Medium | 9.6% |
| Chesterfield | High | 561.3 | High | Medium | 7.6% |
| Clarendon | High | 275.3 | High | Low | 4.9% |
| Colleton | Medium | 194.8 | Medium | Low | 3.7% |
| Darlington | High | 308.2 | High | Medium | 5.6% |
| Dillon | High | 273.3 | High | Low | 5.0% |
| Dorchester | High | 368.7 | High | Medium | 6.7% |
| Edgefield | Medium | 140.1 | Medium | Medium | 6.3% |
| Fairfield | High | 235.7 | High | Medium | 6.3% |
| Florence | High | 322.0 | High | Medium | 6.9% |
| Georgetown | High | 269.9 | High | Low | 4.0% |
| Greenville | High | 369.8 | High | Medium | 7.1% |
| Greenwood | High | 437.6 | High | Medium | 9.2% |
| Hampton | High | 227.1 | High | Medium | 5.6% |
| Horry | High | 309.8 | High | Medium | 7.0% |
| Jasper | Medium | 123.5 | High | Medium | 6.5% |
| Kershaw | High | 489.1 | High | Medium | 6.5% |
| Lancaster | High | 405.2 | High | Medium | 9.6% |
| Laurens | High | 380.1 | High | Medium | 8.0% |
| Lee | High | 311.4 | Medium | Low | 3.4% |
| Lexington | High | 350.1 | High | Medium | 6.2% |
| Marion | Medium | 179.1 | High | Low | 4.5% |
| Marlboro | High | 254.1 | High | Medium | 5.5% |
| McCormick | High | 265.1 | High | Medium | 8.1% |
| Newberry | High | 340.7 | Medium | Medium | 5.4% |
| Oconee | High | 508.7 | High | Medium | 6.8% |
| Orangeburg | High | 206.2 | High | Medium | 5.5% |
| Pickens | High | 401.6 | High | Low | 4.6% |
| Richland | High | 308.1 | High | Medium | 5.4% |
| Saluda | Medium | 132.9 | Medium | Medium | 6.4% |
| Spartanburg | High | 267.3 | High | Medium | 7.2% |
| Sumter | High | 396.8 | High | Medium | 6.0% |
| Union | High | 307.5 | High | Medium | 5.3% |
| Williamsburg | Medium | 174.4 | High | Medium | 5.1% |
| York | High | 416.8 | High | High | 10.3% |
