Summary |

Pursuant to R.61-119, the Department issues permits and registrations for withdrawal and use of surface water from within the state of South Carolina and those surface water shared with adjacent states. This regulation applies to any person withdrawing surface water in excess of three million (3,000,000) gallons during any one (1) month.

The Department proposes amending R.61-119, Surface Water Withdrawal, Permitting, Use and Reporting, to amend definitions and requirements related to permitting and registration of surface water withdrawals. The amendments will clarify anticipated withdrawal amounts and the Department’s administration of its regulatory role in water resource management.

The Department may also include corrections for clarity and readability, grammar, punctuation, codification, and regulation text improvement. The Administrative Procedures Act, S.C. Code Section 1-23-120(A), requires General Assembly review of these proposed amendments and repeals.
