Santee Cooper - Johns Island Transmission Line

OCRM Critical Area Permit Application

HNZ-HS87-DBCK8

PUBLIC HEARING

October 14, 2020

Santee Cooper - Johns Island Transmission Line Application HNZ-HS87-DBCK8

Project Description

- Installation of a new 115kV transmission line approximately 5.17 miles in length connecting the existing Johns Island substation to Dominion Energy's Church Creek-Queensboro transmission line.
- The project length has been reduced by the applicant by 1.2 miles from the original public notice.
- Mostly parallels existing transmission lines.
- New 155' right of way will be established at 2 different locations along the proposed route.
- The transmission lines will be elevated to the same height or higher than the existing transmission lines on metal transmission poles installed via vibratory caisson.
- The purpose of the project is to improve reliability of the power grid.
